# FRESH PINEAPPLE

■ Retail bulk

Pineapples have a wide cylindrical shape, a scaly green, brown or yellow skin and a regal crown of spiny, blue-green leaves and fibrous yellow flesh. The area closer to the base of the fruit has more sugar content and therefore a sweeter taste and more tender texture

# FRESH PAPAYA

■ Retail bulk

Papaya (Maradol and Mulata varieties) chunks which are selected based on a strictly quality process which consist of washing, peeling and sanitizing its pulp before being frozen at  $-45^{\circ}\text{C}$ , keeping organoleptic and nutritional properties of the fruit. The papaya has an optimal maturity, color, taste and texture own of the fruit. It is ready to eat or use as a main ingredient for a secondary product like pulps, jams, nectars, juices, sweetened concentrates, etcetera.

# FRESH BANANA

The banana is a lengthy yellow fruit, found in the market in groups of three to twenty fruits, similar to a triangular cucumber, oblong and normally yellow. Its flavour is more or less sweet, depending on the variety. ... In Spain banana is the fruit consumed in fresh and the other name does not practically exist.

■ Retail bulk

# FRESH MANGO

Mango, *Mangifera indica*, is an ever-green tree in the family Anacardiaceae grown for its edible fruit. The mango tree is erect and branching with a thick trunk and broad, rounded canopy. ... The mango fruit is roughly oval in shape, with uneven sides. The fruit is a drupe, with an outer flesh surrounding a stone.

■ Retail bulk

# FRESH TAPIOCA

Tapioca is a starch extracted from the storage roots of the cassava plant, a species native to the north region and central-west region of Brazil, but whose use is now spread throughout South America. The plant was brought by the Portuguese to much of West Indies, Africa and Asia.

■ Retail bulk

# FRESH

# Organic Lime leaves powder

For a fragrant, citrusy infusion to any dish, lime leaf powder could be your great new go-to ingredient. Not only is it a nice powder to sprinkle atop south Asian dinner dishes, but it can also be used on desserts. From ice cream to noodles, marinades to fishcakes, kaffir lime leaf powder adds an extra little burst of taste and nutritional value to just about anything you make.

Its shape resembles that of an hourglass, making it a noticeable feature of any dish from miles away. Let's explore some of the ways that you can utilize this versatile powder in your kitchen.

There's a common misconception that any south Asian spice is only useful when added to south Asian dishes. This way of thinking only serves to limit the chef from exploring their full culinary possibilities.

lime leaves are an essential ingredient in many Malaysian and more so in Thai cuisines, but are normally not ingested. The leaves flavor the dish, but are discarded rather than eaten. This may be largely due to the fact that they are fibrous and difficult to chew and digest. lime leaves aside from their culinary benefits have a high content of beneficial organic compounds that exert a positive effect on the human body.

# Organic pumpkin powder

Pumpkin powder is made from perfectly ripe pumpkins that are washed, trimmed, cut, and dehydrated. The dried pumpkin pieces are sifted and screened to reduce them to the desired granule size before the powder is packaged for sale. Because only the highest-quality pumpkins are used to create this ingredient, pumpkin powder boasts all the same health benefits and delicious flavor of fresh pumpkins — just with a longer shelf-life.

Pumpkins are naturally high in beta-carotene, which is an excellent source of vitamin A. Pumpkin powder provides a variety of other nutrients, including multiple B-vitamins, vitamins C and E, and potassium. It also boasts a very low-calorie content. When used as a replacement for a portion of the wheat flour in a recipe, pumpkin powder can substantially increase the amount of fiber in the final product. A study showed that replacing between 10 to 20% of a recipe's wheat flour contents with pumpkin powder resulted in a food item with a desirable taste and texture. In fact, the overwhelming majority of study participants reported that they enjoyed the recipe with pumpkin powder and would purchase that food item.

# Organic manioc powder

Tapioca /Cassava/Manihot/Manioc is a starch extracted from the storage roots of the cassava plant ( *Manihot esculenta*).

Although tapioca is a staple food for millions of people in tropical countries, it provides only carbohydrate food value, and is low in protein, vitamins and minerals. It is also used as a thickening agent in various manufactured foods.

Manioc is a calorie-rich vegetable that contains plenty of carbohydrate and key vitamins and minerals.

Although Manioc is a staple food for millions of people in tropical countries, it provides only carbohydrate food value, and is low in protein, vitamins and minerals. In other countries, it is used as a thickening agent in various manufactured foods.

Dried Manioc pearls are 11% water and 89% carbohydrates, with no protein or fat. In a 100 gram reference amount, dried tapioca supplies 358 calories and no or only trace amounts of dietary minerals and vitamins.

# Organic Tamarind paste

Tamarind (*Tamarindus indica*) is a leguminous tree (family Fabaceae) bearing edible fruit that is indigenous to tropical Africa. The genus *Tamarindus* is monotypic, meaning that it contains only this species. The tamarind tree produces brown, pod-like fruits that contain a sweet, tangy pulp, which is used in cuisines around the world. The pulp is also used in traditional medicine and as

a metal polish. The tree's wood can be used for woodworking and tamarind seed oil can be extracted from the seeds. Tamarind's tender young leaves are used in Indian cuisine. Because tamarind has multiple uses, it is cultivated around the world in tropical and subtropical zones.

Tamarind paste is made from a sour, dark, sticky fruit that grows in a pod on a tamarind tree. While some cuisines use tamarind paste to make desserts and even candy, in Thai cooking it is used mostly in savory dishes. Classic pad thai sauce is made with tamarind, as are some Thai curries and seafood dishes.

The polyphenols in tamarind have antioxidant and anti-inflammatory properties. These can protect against diseases such as heart disease, cancer and diabetes. The seed extract may also help lower blood sugar, while the pulp extract may help you lose body weight and reverse fatty liver disease.

# Organic manioc powder

Soursop is a fruit that's popular for its delicious flavor and impressive health benefits.

It's also very nutrient-dense and provides a good amount of fiber and vitamin C for very few calories.

This prickly green fruit has a creamy texture and a strong flavor that is often compared to pineapple or strawberry.

Soursop is typically eaten raw by cutting the fruit in half and scooping out the flesh. Fruits range in size and can be quite large, so it may be best to divide it into a few portions.

A typical serving of this fruit is low in calories yet high in several nutrients like fiber and vitamin C. A 3.5-ounce (100-gram) serving of raw soursop contains (2):

Calories: 66  
Protein: 1 gram  
Carbs: 16.8 grams  
Fiber: 3.3 grams

Vitamin C: 34% of the RDI Potassium: 8% of the RDI Magnesium: 5% of the RDI Thiamine: 5% of the RDI

Soursop also contains a small amount of niacin, riboflavin, folate and iron.

Interestingly, many parts of the fruit are used medicinally, including the leaves, fruit and stems. It is also

# Organic Aseptic Coconut Water

COCONUT WATER IS THE CLEAR LIQUID FOUND INSIDE IMMATURE COCONUTS. AS THE COCONUT MATURES, THE WATER IS REPLACED BY COCONUT MEAT. COCONUT WATER IS SOMETIMES REFERRED TO AS GREEN COCONUT WATER BECAUSE THE IMMATURE COCONUTS ARE GREEN IN COLOR.

COCONUT WATER IS DIFFERENT THAN COCONUT MILK. COCONUT MILK IS PRODUCED FROM AN EMULSION OF THE GRATED MEAT OF A MATURE COCONUT.

COCONUT WATER IS COMMONLY USED AS A BEVERAGE AND AS A SOLUTION FOR TREATING DEHYDRATION RELATED TO DIARRHOEA OR EXERCISE. IT IS ALSO TRIED FOR HIGH BLOOD PRESSURE AND TO IMPROVE EXERCISE PERFORMANCE.
